

Full of Course, The Astronauts Interviewed

SPACE CENTER, Houston (AP)—Mission Control reported today the troubled Apollo 13 spacecraft was off course. The three American astronauts must make a successful midcourse correction or it will miss the earth by 104 miles and be lost in space.

However, officials emphasized that the chances of making the small burn required, with the space-proven engine of the lunar module, are excellent.

Even if that engine failed, the astronauts could then try canceling their plan to either the command ship or the attached lunar module.

Apollo 13 commander James A. Lovell Jr. will be at the controls.

The other crewmen, Fred W. Haise Jr. and John L. Swigert, Jr. will assist him by reading instrument panels.

The engine burn is slated for 11:43 p.m. EST Wednesday night, but could be done later if Mission Control changes its mind.

Again, the astronauts must call on Aquarius, the life-saving lunar module on which resources the astronauts have depended since their command ship lost power and began when an oxygen tank ruptured Monday night, canceling their plans to land on the moon.

The firing is being set for 14 seconds and

will slow the speed of the combined spacecraft by about four miles an hour. Mission Control said the burn would "place the spacecraft back on an earth intercept trajectory."

—JIM MEESE

On its present course, flight directors said Apollo 13 would come in at too shallow an angle and miss by 104 miles. That would send it looping around the backside of the earth—the side opposite the entry approach—and into an elliptical orbit that would take it thousands of miles into space.

It would continue whirling on the path. But the astronauts, already fighting to stay aloft on short supplies of water, power and oxygen, would not survive long.

But neither the ground nor the astronauts appeared concerned. They had confidence that the engine would work, just as it did Tuesday night when it fired for longer, 4 minutes and 24 seconds, to speed up the ship's return to earth after it had looped around the moon.

There was no immediate explanation how the spacecraft would a so-called free return trajectory which would have brought it back to a landing on earth even if no midcourse firing were attempted.

Lovell, Haise and Swigert were in fact more concerned with maintaining the

water, oxygen and power supplies left to none to keep the ship alive until Friday's splashdown.

This time, of course, the command ship engine is silent, victim of Monday night's accident.

The report that the ship was off course came as a surprise. The space agency had said Tuesday, after a firing that zipped Apollo 13 around the moon, that the astronauts were on a path that would drop them into the Indian Ocean Saturday if there were no further engine burns. The firing Tuesday night aimed them at the Friday landing at 12:53 p.m.

Prayers For Apollo

By The Associated Press

People around the world reached out Wednesday the only way they could—with their prayers to help the Apollo 13 astronauts toward their critical splashdown Friday.

Thousands of tourists and Italian journalists their voices in prayer for Paul W. Haise Jr., Fred W. Haise Jr. and John L. Swigert Jr., naming their crippled Apollo 13 spacecraft, their planned moon landing mission aborted because of an explosion in the craft.

President Nixon led prayers in the White House for the astronauts who, he said, had "the spirit of Yikang."

In Denver, Dr. J. Leonard Swiger, father of the command module pilot, said "I'm just praying that the Apollo 13 crew will be able to get everything that should be done, and that the Lord will help him to do so."

Dr. Swiger said that the Apollo 13 crew will be able to get everything that should be done, and that the Lord will help him to do so.

The following is a portion of a transcript from a news conference Wednesday with J. Ethel Cameron, BYU student of students, and Rod Halliday and Ken Markwick, candidates for ASBYU president.

Q: Mr. Halliday, how is your effort to improve the lot of the 25,000 students at BYU as student body president?

Halliday: Well, when you evaluate a candidate running for office, you've got to go by his past record. If he ran for office last year, what did he accomplish? I hope you've already checked that out. You've got to find out how effective the program he's run this year has been.

How effectively has he financially managed the program he is now presenting that needs to be expanded or started? Finally, you have to look at the individual himself. Now, I could state him and give you a resume, but I'm sure you've got to decide that for yourself.

Q: Mr. Markwick, what makes you think you're a better public relations man than Mr. Halliday?

Markwick: First of all, I've worked at this year. On the back page of the *Daily Universe* today (April 15) there are "with a word from me" of the university presidents in Utah (supporting my candidacy), and this has been my concern this year. I've spent a lot of time writing letters, on the phone, and on the road, at

my expense, talking about other student body presidents, other individuals, and I've met with black leaders, here and there. This is a very nice of course, and I'm sure it will be of help to us.

Q: Do you work toward Heber Weisley's office (Assistant to President Ernest Wilkinson, for university relations)?

Markwick: Yes. Mr. Weisley was a report that you went to a WAC conference in Salt Lake City. Could you explain what that meeting was?

Markwick: This was where we had some black student leaders from Wyoming, and the U of U and also the student body president from Wyoming, and U of U, and ASU also. For the first time BYU sent a committee to meet with some black student leaders and discussed problems. I think this is where the discussion should take place before we have these same discussions held in a different manner on the basketball court, or on a football field.

Q: You have heard that this meeting, the fellow who was representing the U of U said that if you were sent to represent, as a committee, they would open a wooden box and send you back. Why do you think he got this impression?

Markwick: Don't take it. (Continued on page 5)

Mormon Astronaut Gives Gospel Advice

"Don't be intellectually embarrassed by things like faith, and testimony, and hanging on to principles," advised nuclear scientist and astronaut Don Lind at a Tuesday night meeting.

Utah-born Lind was speaking at an AMA meeting where he arrived straight from the Air Force base where he had been in Houston, Texas, after a mission to the moon.

Lind is in Provo for ROTC week, and he will be speaking in the Varsity Theater today at 4 p.m. Wednesday he spoke to geology and physics students at two meetings during the day.

Reflecting on his experience and the experience of the other astronauts, Dr. Lind paralleled some of the decisions which have to be made in an emergency with the everyday decisions which "we are going through in this life. Particularly in their late high school experience, and their early college experience where the decision-making process creates a crucible."

DON LIND COMES TO Y

Excavations Start

Excavation work has been started on campus for the installation of utility lines to new buildings, it was announced Tuesday by the new Activities Center.

He said work will continue several months and urged faculty, students and the public to cooperate although some inconvenience may be caused.

A trench already has been dug from the Desert Tower to the site of the new Activities Center for the extension of the high temperature hot water heating system to the huge structure. Contractor is the Tobco Construction Company of Salt Lake City.

Beginning next week and requiring about three months will be the construction of two overruns over the Campus Drive and an underpass under Phillips Lane leading to the new Activities Center. Phillips Lane will be cut about the first work of Y.

The project will begin in the corner of the two parking lots east and west of

Professor Receives Research Awards

Dr. L. Douglas Smoot, associate professor of chemical engineering at BYU, has just been awarded two research grants for work related to rocket propulsion.

The first grant for \$22,000, for the first year of a four-year study totaling \$140,000, is from the Office of Naval Research, Washington, D.C. It will study the combustion of fast particles in a catalytic stream.

The work has application to the development of a new augmented rocket system. Augmented rockets in many ways are like jet engines. Instead of a solid propellant fuel, rather than a liquid hydrocarbon fuel.

The second study, a one-year

contract totaling \$12,000 from the Naval Weapons Center, China Lake, Calif., will involve the development of a mathematical model to describe the exhaust plume of a missile. This model often contains solid propellant grains which very hot rocket exhausts. This high temperature causes certain exhaust species such as sodium and potassium to ionize, thereby making them electrically conductive. The ionization causes the communication signals to be disrupted.

Dr. John Simonson, chairman of Mechanical Engineering Dept., and Paul Hedman, Ph.D. student in Chemical Engineering, will participate in future research programs. Also working on the first year program are Wayne Wells, Gregory Anderson and Robert Douglas, M.S. graduate students in chemical engineering.

Work on both studies has been initiated. Early results of the first study are being presented in a paper by Dr. Smoot, Dr. Simonson, Mr. Douglas and Mr. Wells at the American Institute of Aeronautics and Astronautics Conference in San Diego in June.

Washington AP

President Nixon postponed yesterday the scheduled meeting with the people on Vietnam and prospects of more troops withdrawal to the nation can keep better tab on the plight of April 13 and in the interim crew.

Nixon had listed radio-television address from the White House the first time to be announced later.

The President was described by press secretary Ronald L. Ziegler as wanting to avoid pre-empting time on the network while a worried nation concentrates on the return of Apollo 13.

Originally, the goal had been to announce a decision on troop withdrawals by April 15-Wednesday—with some sign that it might call for bringing in of oil from Tanam Bay Friday.

In recent weeks, fresh trouble in Cambodia and Laos recently has brought pressure from U.S. military leaders to slow the withdrawal.

But Secretary of Defense Melvin R. Laird continued that the current program "will be followed in the months immediately ahead by the redeployment of about 25,000 of American troops to Vietnam."

He said he expects you to think of the situations he will have to face. Imagine him talking to leaders of the Black Student Alliance on the media on behalf of BYU students. The days of press portraits and party game are over. The days of press portraits and party game are over. The days of press portraits and party game are over.

Inside Cambodia North Viet Camp Crushed

SALGON (AP)—More than 100 North Vietnamese refugees, captured in Cambodia, turned up in Salgon, a North Vietnamese camp, informed sources reported Wednesday.

This was the first reported instance of Cambodians joining South Vietnamese in a large operation, although Cambodians recently acted as a blocking force for a South Vietnamese attack on the Viet Cong hideout in Cambodia.

The battle broke out Tuesday five hours after North Vietnamese troops had attacked a South Vietnamese border post in the same area and repulsed. Fighting was confined to the Viet Cong hideout.

South Vietnamese soldiers killed 700 enemy soldiers were destroyed and 500 bunkers were killed. South Vietnamese soldiers killed 700 enemy soldiers were destroyed and 500 bunkers were killed.

Witnesses reported, however, that 100 Cambodian soldiers were seen in the fighting inside Salgon and were easily

South Vietnamese Camp Crushed

distinguishable by their uniforms. They said Cambodians were given ammunition and food by the South Vietnamese and were under South Vietnamese command. Cambodian casualties were unknown.

The fighting broke out Tuesday after Cambodian and North Vietnamese forces were assaulted by North Vietnamese after a barrage of rockets and mortar. The current battle is about 15 miles south of these outposts.

Bavel has been regarded as one of a series of important military strongholds of the Cambodian side of the border.

Elsewhere, U.S. tank crews based at Phe Nam Khanh, about 20 miles from Saigon, killed 20 North Vietnamese who had fired rockets, mortar and artillery ranging across the border, the source said.

The joint operation closed Highway 1 to traffic north on the Vietnamese side of the border as convoys of trucks and armored personnel carriers moved government forces across the frontier.

One source reported one convoy was five miles long. The highway, the main artery between Saigon and the Cambodian capital of Phnom

Man Arrested; Charged With Triple Slaying

FARMINGTON, Utah (AP)—A 23-year-old man was arrested today in the slaying last week of a Layton housewife and her two young children.

Hammon withheld the man's name, saying no formal charge had been filed.

Hammon said the man was arrested in nearby Ogden, Utah, and was charged with the slayings.

The slayings were discovered last Friday, the sheriff said.

The bodies of Del Jean Longfellow, 24, and her 6-year-old daughter were found at the family home in Layton. They had been badly mutilated and bled.

Hammon said Tuesday investigation had established that the slayings were committed by the victim's husband, Don Langston, was out of state on the night of the murders.

Arab Mob Attacks Embassy in Amman

Amman (AP)—A mob of Arab soldiers and civilians attacked the U.S. Embassy in Amman, Jordan, today.

The mob, which was armed with stones and clubs, broke through the embassy gates and set fire to the building.

The U.S. State Department said it was not sure if the attack was a protest against the U.S. position on the Arab-Israeli conflict.

A thinking, articulate leader is more important on the BYU horizon than any other type of candidate. Think of next year's studentbody president in the situations he will have to face . . . Think of those now running . . . There is an alternative. A write-in can give us the studentbody president we need.

WHAT IS A WRITE-IN?

When regular procedures, for one reason or another, fail to provide candidates suitable for the needs of the time, Americans have seen fit to write in on the ballot the name of a candidate or candidates more to their liking and more suitable to the requirements of the day.

If you come to the same conclusion at which we have arrived, you with us can make use of the democratic process and write in the name of the person you would like to see as studentbody president next year.

An activity card to obtain a ballot, a pen or pencil to write in the name of a desire for an alternative is all that is needed. Simply write, at the bottom of the presidential column, the candidate you would like to see as ASBYU President. It is legal, possible, and it will succeed if you make the effort.

WHY A WRITE-IN?

Some people feel that the election for studentbody president was for all intents and purposes decided in the primary election, which eliminated the candidates. The primary election for president drew approximately 5,700 votes. That is not representative of a studentbody of 25,000. As indicated on the front pages of the Daily Universe last Monday, several factors resulted in the victory of two candidates who were better known than their principle opponents. The discussion of issues was limited by the same factors and therefore it is our feeling that it was not understood that a real alternative was being offered during the primary election. It further appears that the voting was dominated by those new to ASBYU. Therefore, it is impossible to discredit the efforts of those who take an interest. However, student government does need the interest of all student-members through elections. We urge you to join and write in a candidate who will give student government a real meaning.

WHAT DID STUDENT BODY PRESIDENT DO WE NEED?

There is not a high school in the nation with a population of 25,000 people. The students of Brigham Young University are a unique group. The day we rejected candidates who use simplistic slogans or hide behind cartoonish ghosts. We need a studentbody president who can grasp real issues and represent us in a positive way. We need a president who will not want complimentary tickets for the job he has to do.

As you may see you to think of the situations he will have to face. Imagine him talking to leaders of the Black Student Alliance on the media on behalf of BYU students. The days of press portraits and party game are over. The days of press portraits and party game are over. The days of press portraits and party game are over.

Pilgrim's
Progress

APOLLYON STANDS over his condemned brethren in a scene from "The Pilgrim's Progress," playing April 22-25 in the de Jong Concert Hall.

Classic Opera Returns

"The Pilgrim's Progress," a Chorus, have been assembled under the baton of Prof. Lawrence Sadoski to bring the production to life.

Lowell Murdock, who will play the role of John Bunyan, is a veteran of BYU opera. He sang recent roles such as Jack Rabin in Puccini's "Crisis of the Golden West" which played last November.

Cheryl Robinson, who will sing Pilgrim on Wednesday and Friday evenings, is a 1965 graduate from Harvard Law School and a graduate student in the BYU Music Dept. He now has a hundred more, including the BYU Philharmonic Orchestra and the Opera Workshop.

Arden Hopkins also experienced in BYU opera. A junior in applied music at BYU, Arden will sing Pilgrim on Thursday and Saturday evenings. He also sang Pilgrim last year.

Dr. Lawrence Sadoski, a senior in applied voice whose opera experience includes "Aida," "Andrea Chénier" and "Amahl and the Night Visitors."

Prof. Max Groginsky, stage director since last year, has supervised a movement design in which chorus, soloists and dancers blend into various meaningful patterns. During his recent introduction by Dr. Lawrence Sadoski, he was introduced by Dr. Lawrence Sadoski, who will sing Pilgrim on Wednesday and Friday evenings, is a 1965 graduate from Harvard Law School and a graduate student in the BYU Music Dept. Students Help Choose

(Continued from page 1)

To all men... if there is anything virtuous, lovely, or of good report or praiseworthy, we seek after these things."

The eighth and final question is that the speaker be "needed for a balance in total program to stretch the mind of our students."

Once these eight qualifications are met and names are called, at least of eight of the top speakers in seven categories is completed.

This year's list included Shirley Temple Black, former actress, and Dick Van Dyke, comedian and actor, as the top two choices in the field of first. In the political category, Gov. Ronald Reagan of California and Sen. Edmund Muskie of Maine headed the two major political viewpoints.

Neil Armstrong, astronaut and first man on the moon, and Don Lind, LEO astronaut, were the top two in science. Dr. Norman Vincent of the Urban League, minister, and Whitney Young, president of the Urban League, in social science; Al Capone, cartoonist, and Billy Rose, writer in politics, in the "popular" category.

In the field of international affairs, Walter Lipp and Henry Kissinger, Nixon adviser, came ahead in the ratings while national affairs were Walter Cronkite, CBS News anchor, and Secretary of Defense Frank Rusk of the Department of Health, Education and Welfare.

Once the list is compiled, the most difficult obstacle of all, to say nothing of that of matching availability with BYU's schedule. According to Woodward, most speakers have to be booked from eight to 16 months in advance and "we must balance time with the available budget."

"And it must be remembered we are in competition with other universities over the United States."

Peraps the highlight of the production will be the concert added by the proposed concert. Planning has been done on location in various parts of Utah.

Last year's production received accolades from music and drama critics all over the state. The staff and crew of this year's effort hope to excel that rating.

"Whatever you may think this year," Prof. Groginsky has said, "I want more Pilgrim's Progress!" is the most exciting experience I have had in opera since then."

Tickets are currently on sale in the BYU Music Dept. Office, Harris Fine Arts Center, at the cost of \$1.50, \$2 and \$2.50.

Candidates Interviewed...

(Continued from page 1)

Mr. Hubbard, are you going to make any effort to cut down on goodwill trips by prep groups such as the Congresses or the flag twirlers?

Hallday: You know, there's only so much money to go around. The problem is how effectively it can be used to promote what I feel that groups like the Congresses represent very effectively.

I was at the school at BYU when the girls were out on the floor and they got a standing ovation from the crowd and I really looked good to see them because they thought for what they believe. Now, to that extent, I think they represented the school as much as the basketball team, and they put on as good a show at the basketball team as far as bravado is concerned.

Murdock: Of course, the decision isn't ours to make. The decision is Huber's. In some cases in the latter part of this year, the trip were cut because of the danger involved, and I think there is danger involved in our being taken.

We have to be concerned with the safety of the members and the reputation of our school were to happen in working with the Administration, I think we should send out as many groups as we can, but I think it should be a guideline.

Q: You said that public relations efforts you thought the Administration, I think we should send out as many groups as we can, but I think it should be a guideline.

think you can really make a contribution, because students will listen to other students."

And he said that if they are assumed that the students are actually questioning the school and are concerned about it, and not sitting back and being "mice," then something can be accomplished. I agree with Ken that we have to be careful. We have to get the total perspective of what President

Watkins is trying to do, what Huber Wolter is trying to do, and what student government is trying to do, but I think something can be done, and I don't agree with the laissez-faire attitude that if you let it alone it will go away in time.

Q: Mr. Hallday, you said that the Church should enforce dorm standards. Exactly how is The Church to enforce them?

Hallday: I don't like the word "enforce," and I don't like the word "enforce." I think, in my view, I couldn't find a better word—because it implies force. You really can't force anyone to comply with the dress standards. These beautiful girls on campus are going to continue to wear their short skirts regardless of whether or not they think they would, unless they're personally convinced to enforce discipline. I sat on a committee with Dean Cameron (the principal dress standards), and

I sat on a committee with Dean Cameron (the principal dress standards), and

Q: Mr. Hallday, you said that the Church should enforce dorm standards. Exactly how is The Church to enforce them?

Hallday: I don't like the word "enforce," and I don't like the word "enforce." I think, in my view, I couldn't find a better word—because it implies force. You really can't force anyone to comply with the dress standards. These beautiful girls on campus are going to continue to wear their short skirts regardless of whether or not they think they would, unless they're personally convinced to enforce discipline. I sat on a committee with Dean Cameron (the principal dress standards), and

it's almost impossible to enforce them. There are so many—huh to even call them "violations." But all we're saying here is that we agree with the dress standards. We think there should be a standard because they add status to the University, and we think we'll always have them because the Brothers are at the helm, but all we're saying is that it can be better administered if it's done through the ten stake presidents and the bishops.

Hallday: I'm not saying that we're saying here is that we agree with the dress standards. We think there should be a standard because they add status to the University, and we think we'll always have them because the Brothers are at the helm, but all we're saying is that it can be better administered if it's done through the ten stake presidents and the bishops.
